Adherence rate = Total # of Yes / Total # of Observed x 100						

Adherence Monitoring: Indwelling Urinary Catheter Maintenance Practices

Instructions:

1. Do random audit once in a week in adult medical surgical ICU and use this tool to observe staff's IC practice in patients
With indwelling Foley's catheter
2. Observe each practice and check the box if adherent, Yes or No.
3. Check the box for each practice observed
4. Write the total number of "Yes" for adherent practices observed and total number of observations
5. Calculate the adherence rate (%) - Total number of yes / total number of observed x 100.
